Experience

Ubank

Software Engineer — Full Time | September 2026 – Present

Mantel

Senior Software Engineer — Full Time | December 2025 – September 2026

- Built Guardian, Lendi Group's customer-facing, agentic mortgage assistant that guides customers through refinancing and property purchases. It provides personalised home loan information, captures customer details, and seamlessly transitions qualified leads to mortgage brokers via appointment booking or live handoff.
- Developed internal AI capabilities for Lendi Group, enabling teams to build, orchestrate, and manage reusable agentic workflows across multiple business use cases.

Software Engineer — Full Time | March 2024 – December 2025

- Developed the Solo by MYOB mobile application from the ground up in a cross-functional team, delivering the product in under 12 months using React Native and GraphQL.
- One of two engineers responsible for implementing Tap to Pay in Solo by MYOB, a flagship feature that differentiates the application in the market.
- Modernised segments of the UI of the legacy Xero Practice Manager (XPM) application.

Associate Software Engineer — Full Time | February 2023 – March 2024

- Developed generative AI solution accelerators within the internal AI team, enabling multiple client engagements.
- Led three client demonstrations of generative AI solutions, contributing to the successful acquisition of a $2 million client project.

Cheil Australia

Junior Frontend Developer — Full Time | August 2022 – December 2022

- Sole frontend developer for the Samsung BESPOKE Fridge Configurator, taking ownership from development through delivery.
- Delivered conversion rate optimisation (CRO) initiatives by working closely with UX and optimisation teams to scope, develop, and launch A/B tests.

Digital Experience Intern — Internship | May 2022 – August 2022

- Developed and maintained components across the Samsung marketing and e-commerce websites.

Skills

Languages & Frameworks: TypeScript, Python, React, React Native, Angular

Backend & Data Infrastructure: Docker, Kafka, Azure Functions, GraphQL, PostgreSQL, MongoDB, Auth0, OpenFGA
